SUMMARY

I'm a self-taught web developer proficient in front-end technologies, specializing in React.js and Vue.js. I also have experience in back-end development with Node.js, Express, and MongoDB. With a focus on clean code and innovative solutions, I'm dedicated to continuous learning and contributing to dynamic projects.

SKILLS

Technologies:
- HTML
- CSS
- JavaScript
- TypeScript
- SASS
- NodeJS
- MongoDB

Frameworks/Libraries:

PROJECTS

Audiophile

My first programming project: an e-Commerce application, named Audiophile, where audio items can be purchased.
Technologies Used: HTML5, CSS3, SASS, JavaScript, React.js, GitHub, Netlify
Links: Audiophile |github.com/Audiophile

Gifty

An app, made in collaboration with a friend, where you can make a wishlist, from which your friends and family can claim a present to give you, or they can create their own wishlist.
Technologies Used: HTML5, TailwindCSS, TypeScript, React.js, Vite, GitHub, Netlify
Links: Gifty |github.com/Gifty

Paws ans Guess

A dog breed guessing game, made with the scope of learning how to use an API.
Technologies Used: HTML5, TailwindCSS, JavaScript, React.js, GitHub, Netlify
Links: Paws and Guess | github.com/Dog-Guesser
